PARIRAM S

SOFTWARE DEVELOPER

Chennai, Tamil Nadu, India | 9944600249 | pari.pariram.ram@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Software developer with experience building Java and AWS applications, microservices, event-driven middleware, and third-party integrations. Work includes scalable data ingestion, asynchronous file processing, secure APIs, and operational monitoring. Focused on practical system design, reliability, and continuous learning.

Selected impact: scaled job processing from 40,000 to 150,000+ jobs; improved candidate and application ingestion by 50% and 300%; reduced file access delays from up to 24 hours to near-instant access.

PROFESSIONAL EXPERIENCE

SDE 2 | PayPal | Nov 2024 - Present | Chennai, India

Software Developer M2

Symphony Talent, India | May 2023 - Nov 2024

- Reworked job ingestion with pagination, update-based synchronization, and caching; increased processing capacity from 40,000 to more than 150,000 jobs while reducing memory and CPU use and addressing time-zone and daylight-saving issues.
- Changed a scheduled compressed-file pipeline into near-real-time processing that downloads, decrypts, decompresses, and moves large files; reduced file-access delays from up to 24 hours to near-instant access.
- Built scalable APIs with asynchronous internal communication and synchronous client responses, dynamic data mapping, and job-status and failure reporting; supports millions of requests and helped reduce client market-to-live time from months to days.

Software Developer M1

Symphony Talent, India | May 2021 - May 2023

- Moved candidate and application ingestion to the FastConnect model, consolidating API calls and reducing HTTP overhead; candidate ingestion increased 50% and application ingestion increased 300%.
- Developed a loosely coupled middleware framework for asynchronous cross-system synchronization, with automatic retries and status logging to support reliable integrations and faster client onboarding.
- Implemented authenticated internal APIs, a centralized data-distribution processor, and customizable real-time ATS integrations.
- Built a reusable alert and notification system for application outages and performance summaries; adopted across multiple applications.

Software Developer Intern | Symphony Talent | Mar 2021 - May 2021 | Bangalore, India

TECHNICAL SKILLS

Languages	Core Java, Python, JavaScript
Cloud and APIs	AWS, API Gateway, S3, SQS, WAF, EC2, REST APIs, caching
Architecture	Microservices, event-driven systems, asynchronous processing, high-level and low-level design
Frameworks and tools	Spring Boot, Hibernate, MuleSoft, Apache Camel, ActiveMQ, Docker, Jenkins, Git, JIRA, Graylog, New Relic
Practices	Data structures and algorithms, problem solving, Agile software development, integration design

EDUCATION

B.E., Electronics and Communication Engineering | Sri Krishna College of Technology, Coimbatore | 2017 - 2021 | CGPA: 9.27

Higher Secondary Education | Chinmaya Vidyalaya, Rajapalayam | 95%

CERTIFICATIONS

AWS Certified Solutions Architect - Associate; AWS Cloud Practitioner; Java and Spring Framework using Spring Boot; Spring Boot Microservice and Angular; Kubernetes CI/CD; AWS Microservices Architecture: Design Principles; Data Structures and Algorithms; Design Patterns in Java; GitHub Copilot Fundamentals: AI Paired Agile; Scrum Master.

SELECTED PROJECTS

- **Chess game:** Built a React and JavaScript chess app with piece-movement validation against chess rules.
- **To Do app:** Developed a Flutter task manager with priorities, categories, due dates, editing, and completion tracking.
- **Smart EMS:** Connected an Arduino RFID scanner to an employee-management web app built with Java, Python, and MySQL.
- **Shopping website:** Built an interactive site using HTML, CSS, JavaScript, JSP, Java Servlets, and JDBC.
- **Voice-controlled smart home:** Prototyped appliance control using NodeMCU, Google Voice, and IFTTT.
- **Wireless monitoring system:** Created an Arduino and transceiver-based academic prototype.
